

Y

Yard	The place where logs are accumulated.
Yard Lumber	Lumber of those grades, sizes and patterns generally intended for ordinary construction and general building purposes.
Yarding of Un-merchantable Material	Yarding of cull, rotten, small, or otherwise unusable wood material to be a designated area for disposal is written into the timber contract. This is required on all USDA Forest Service timber sale contracts.
Yardstick	A wooden rule 36" long.
Yield	The amount of product output recovered from a quantity of raw material input in forest product industries. Estimate in forest menstruation of the amount of wood that may be harvested from a particular type of forest stand by species, site, stocking, and management regime at various ages.
